Definitions

Vision

A vision is a faith-based concept of what God desires from us in the future.

Philosophy of Ministry

Philosophy of Ministry is a set of unbreakable principles that guide how a particular ministry functions and develops. It answers the question, "Why are we doing what we are doing?"

Mission and Vision

The church that lives the gospel, preaches it to others, and makes disciples for the glory of God.

A correct understanding of the current situation of the church (or a specific ministry) involves knowing where we are right now, having a clear vision for the future, and understanding how God wants us to move forward.

Goals and Tasks

Why does the church exist?

What are its goals and purpose in the world?

What has God placed us here?
